These are a few electrical safety rules to give students ideas but the contest is not limited to these tips:

1. Only plugs should go into outlets.
2. Never overload electrical outlets.
3. You must be dry to touch anything electrical.
4. Never fly kites near power lines.
5. Stay away from fallen power lines.
6. Stay away from substation fences and utility towers.
7. Stay away from trees near power lines.
8. A multipurpose fire extinguisher should always be kept in the house.
9. Electric cords should not run under rugs or near hot appliances.
10. Safety caps should be inserted in outlets when small children are around.
