These are a few energy conservation tips to give students ideas but the contest is not limited to these tips:

- 1) Turn off lights, computers, TV and other electrical stuff when you aren't using it.
- 2) Replace regular light bulbs with energy saving Compact Fluorescent Light Bulbs (CFL's).
- 3) Don't leave the refrigerator door open. Cold air escapes and this uses a lot of electricity.
- 4) Taking a short shower instead of a long bath can help save energy.
- 5) Plant a tree. Trees create shade around your house and help keep it cool.
- 6) Use fans, keeping windows and doors shut and closing shades during the day.
- 7) Unplug electronics, battery chargers and other equipment when not in use.
- 8) Don't leave on your computer, TVs, radios or games that use electricity when you're not using them.
- 9) Turn off unnecessary lighting and use task or desktop lamps with CFLs instead of overhead lights.
